

FLEXA DROPS

Ensures Health, Vitality & Growth

INDICATIONS:

Folic acid
deficiency

Malnutrition

Megaloblastic
anemia

Anemia due
to illness

Vitamin B12
deficiency

ROLE OF INGREDIENTS:

FOLIC ACID:

- ♦ Folic acid helps to form DNA and RNA and is involved in protein metabolism.
- ♦ It plays a key role in breaking down homocysteine.
- ♦ It is needed to form healthy cells.

VITAMIN B12:

- ♦ Vitamin B12 is important for central nervous system function, forming red blood cells and to produce energy.
- ♦ Vitamin B12 is also used to form DNA and RNA so that it can make new cells to grow, and for the normal function of the immune system.

Flexa drop contains pure, all-natural ingredients
