

Foli-4

TABLET

The Innovative Folate

INDICATIONS:

Pregnancy

Lactation

Preconception

Fatigue

Neurological problems

Anemia

Iron deficiency

QUATREFOLIC:

- Highest bioavailable and bio active form.
- It is the only form able to cross the BBB (Blood Brain Barrier).
- Usually transported into peripheral tissues to be used for cellular metabolism.
- Bioavailability is not affected by multi-steps process of conversion and by metabolic defects typical of folic acid and food folate, such as the polymorphism of the enzyme MTHFR.

Foli-4 provides active form of folate, immediately available for biological action

Foli-4 has 7 times greater bioavailability than regular folic acid

Numerous pre-clinical and clinical studies have proven its safety profile

Foli-4 is manufactured in accordance with GMP standards

Foli-4 has better patient compliance & has long lasting stability

COMPOSITION:

Each Tablet Contains:

Quatrefolic.....300 mcg

DOSAGE:

FOR PREGNANCY AND LACTATION:
