

IROLIC

SUSPENSION

Best choice for rapid rise in hemoglobin

INDICATIONS:

Premature Babies

Iron Deficiency
anemia

Mal absorption

Lactation

Pernicious anemia

Folic Acid Deficiency
Anemia

Birth defects

ROLE OF INGREDIENTS:

FERROUS SULPHATE:

- It is utilized effectively in treatment of anemia caused by lack of iron in the body.
- It provides 20% elemental iron.
- It is rapidly absorbed from GIT to give a rapid effect.
- No conventional side effects like nausea, constipation and teeth staining.

FOLIC ACID:

- Prevents NTD (Neural Tube Defect).
- Supports normal growth and development during pregnancy, childhood & adolescence.
- Reduces the risk of premature delivery and birth defects.

Maximum and sustained absorption of iron.

Better tolerated as compared to other forms.

Higher elemental iron than ferrous gluconate.

Absorbed rapidly from GIT.

Quick and rapid bioavailability.

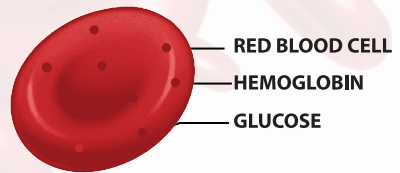

Rapid rise in Hemoglobin.

High potency iron.

COMPOSITION:

Each 5ml contains:

| | |
|------------------------|-------|
| Ferrous sulphate | 30mg |
| Folic acid | 550mg |

DOSAGE:

For Adults and Pregnant women:
2 teaspoonful 2 times a day.

For Children: (6 to 12 yrs)
1 teaspoonful 2 times a day.

For Children: (3 to 6 years):
