

Setofer Sachet

FOR RAPID RISE IN HAEMOGLOBIN

INDICATIONS:

Pregnancy & lactation

Folic acid deficiency anemia

Pernicious anemia

Weak immunity

Fatigue & weakness

Early or weak pregnancy

ROLE OF INGREDIENTS:

FOLIC ACID:

- Folic acid may protect during pregnancy against depression and birth defects.
- It reduces neonatal mortalities from Neural Tube Defects (NTDs) and is efficacious in treating anemia.
- Supports normal conversion of homocysteine to methionine.

VITAMIN C:

- Vitamin C is vital for both mother and baby.
- Acts as a powerful antioxidant needed for the development and maintenance of arterioles, scar tissues and cartilage.
- Helps to boost immunity and improves the ability to absorb iron.

VITAMIN B12:

- Nourishes the brain and nervous system.
- Assists with the formation of healthy red blood cells.
- Plays an important role in the body's energy production.
